About

Machine Learning has already been revolutionizing how the world works. Making services smart reduces the work humans have to do and offering such services increases the revenue of the companies. KwickUp Skills already makes the process of payments easier but wait, we have to make it smarter! And how do we do that?

Say HI to **IntelliKwitt**.

IntelliKwitt is an open machine learning API which keeps track of the payments of the customer and tries to make his payments smarter. The customer loves coffee? Cool ! More bonuses and discounts on Coffee! The customer has an edge for an adventure? Cool ! Easier microinsurances to keep him away from danger.

❮ What is KwickUp?

Welcome to **Kwick-Up** platform, based on **Kwitt**.

Now you are not only able to interact with your friends, but every vending machine, shop or local vendor can be your friend just like on Whatsapp.
Buy a coke from the nearest vending machine, pay for your parking or even purchase a suitable small insurance for you while going skiing.
In Kwick-Up you have the possibility to enable Age-Verification and Bank-Trust Skills, which would allow you to prove your age or financial ability when purchasing such goods as a club ticket or renting a car.

Banking transactions digitalized, made now easy and suitable for you. Be one of the first to try the future of payments in Germany.
